# FLAMING PASSION FOR FIRE

## INNOVATIVE TECHNOLOGY IN TIMELESS DESIGN

A crackling fire draws the eye and invites you to relax in front of the fireplace. If you want to experience fire in exclusive style, let yourself be inspired by the impressive variety of extraordinary LIVING FIRE stoves by Spartherm. Manufactured in Germany with high-quality select materials, the current models combine innovative stove technology and pioneering design in harmonious perfection. To make the fire experience even more personal, numerous modifications have been developed to customise each stove to suit your own needs. Numerous LIVING FIRE models also feature the sophisticated „S-Thermatik NEO“ combustion control system, which uses the fuel to maximum efficiency in the spirit of sustainability. At the same time, the optional thermal storage elements provide even more cosy warmth and a feel-good ambiance in the firelight.

## LIVING STYLES – A FIRE FOR EACH STYLE

Elegant design classics in vintage style, modern Scandinavian furniture or purist minimalism: personal furnishing styles often reveal a person's deepest wishes and needs. After all, the design of your personal haven of relaxation is a very individual decision. If you can evoke emotions and create harmonies through furniture and decorations, you will feel comfortable in your own home. Then the only thing missing is an open fire to warm your body and soul. That is how you create a place that naturally connects with stories and with people - a real home.

So it is no wonder that more and more people have come to appreciate this special homely feeling. That is why Spartherm has designed its LIVING FIRE product range with so many variants so that the stoves can be freely positioned in the room to create unique accents in the ambiance. Thanks to the innovative design ideas of the Spartherm experts, the stoves fit seamlessly into any individual furnishing concept – for a tasteful, exclusive and stylish addition to your home.

# PASSO

Round and attractive

The round shape is what makes the Passo so charming. Clean lines and a no-frills design allow this stove to harmonise with a wide variety of furnishing concepts in its discreet and calming manner. At the same time, the Passo has a certain presence, but as a slender column it is also elegant and not too dominant.

# PASSO

Elegance and performance

## SMART FIREPLACE ASSISTANCE FUNCTIONS

S-Thermatik NEO  
(combustion control)

S-USI II  
(underpressure control)

Additional available models such as the Passo XS in a rather small compact design and the Passo L as a high column are equally impressive. All Passo variants present the blazing fire at the centre of the stove at a 180 degree angle. This creates a natural feel-good atmosphere.

# PASSO

Bold colours

Passo XS style

The Passo XS style is available in an inspiring array of modern colours. The handle and the base are made of real wood and give the extraordinary stove a young and urban look, just like the soft edges of the steel body. The unique, specially developed 180-degree panoramic glass creates a beautiful stage for the fire.

In addition, the exceptional style is underlined by smart assistance functions. For instance, the electrically controlled "S-Thermatik NEO" makes sure that the logs in the stove burn evenly and effectively. Moreover, an electrically operated underpressure control can provide maximum safety in a smart way – that's Living Fire by Spartherm at its best!

# PASSO

Unique on three legs

A design highlight for any home. The Passo XS tripod is a stove that rests majestically on a pedestal like a piece of furniture and unites the best of both worlds. Its three legs not only ensure the Passo XS tripod is stable, they also make it a defining style element in any furnishing concept.

As safety is a top priority for all stoves in the Living Fire by Spartherm range, the smart underpressure control has also been developed for this model. In this model the latest innovative combustion technology meets today's fashionable style. This unique look is a true eye-catcher for an extraordinary ambiance.

# CUBO

For unique style

Cubo L style

You fancy shape and colour? Then the Cubo L style with its generous glass across the corner is sure to whet your appetite for style with its many design variations. Be it the soft wood tone or the turquoise colour reminiscent of the ocean, with the Cubo L style modern trend colours and wood elements can be combined in many new ways – for a unique personal style.

To support this style in a smart way, Spartherm has developed some innovative assistance functions for the stove. For instance, the electrically controlled S-Thermatik NEO allows the wood to burn evenly in a CO<sub>2</sub>-neutral manner. The electric underpressure control, designed according to the latest state of the art, ensures maximum safety.

# SENSO

Timeless design in classic shape

Senso L classic

With its high-quality cover panel made of the radiantly bright Portuguese limestone Porto Blanco, the design of the Senso L classic is reminiscent of a Hellenistic column. The dark body and the light stone of the cover panel form an elegant contrast. This creates a visually interesting field of tension as an impressive frame for a crackling fire – for a unique fire experience.

With its smart assistance functions, Senso L classic is also perfectly equipped for the future. The S-Thermatik NEO, for example, automatically ensures that the logs burn evenly, while the electrically controlled S-USI II underpressure control safeguards the flickering flames.

# SINO

A true classic

Cosiness has a name: Sino City. This unique stove from Living Fire by Spartherm brings nature into your home. Sino City is available in a variety of natural materials: Sahara colour sandstone, soapstone in a stylish grey or the light limestone Porto Blanco.

Sino City

The different natural stone cover panels radiate warmth and tranquillity. Their discreet appearance blends harmoniously into the style world of the respective interior design concept. In addition to the natural stones with their unique grain, a warming plate for a tea set and the spacious firewood compartment create a relaxing atmosphere inviting you to lean back and feel at peace.

# AN EYE-CATCHER IN A COMPACT FORMAT

## CLEAN FIREPLACE DESIGN FOR AN IMPRESSIVE VIEW OF THE FIRE

Fire has an archaic power and is a source of immense fascination. It creates warmth, light and atmosphere. The modern compact units of LIVING FIRE focus fully on the open fire. Their straight-lined, reduced design emphasises the impressive vitality and force of the flickering flames. Depending on your taste and the architectural situation, compact units are available with different types of glass: a single, wide panoramic glass or a corner solution with two glass windows arranged in an L shape. The U-shaped models with three glass windows open up a full view of the fire from any point in the room. In addition to their impressive, modern appearance, compact units by LIVING FIRE will surprise you with how fast they can be installed; the units are delivered with all cover panels in place and ready for installation. That makes their installation quick, easy and clean.
