# SHARON PLUS

Tight and **hermetic** pellet stove with ducting system

Evolution  
*Life*

**A+** | 10,0 kW-N | 287 m<sup>3</sup>

## CHARACTERISTICS

- Extractable burn pot for easy cleaning
- Output smoke outlet possibilities: rear, upper
- Ducting system output possibilities (Ø80 mm): rear
- Radiant surface heat exchanger
- Double door: Glass ceramic external door
- Wide fire vision
- Reduced depth (slim)
- Emergency module
- Ash compartment
- Door fire and brazier in cast iron
- With the AUTOMATIC function activated, the stove manages the power output so that the room temperature set by the user remains constant. This minimises power fluctuations to the benefit of thermal and acoustic comfort
- With AIR ZONE CONTROL (AZC) the speed of rotation of the ducting fan is managed with the aim of maximising the transmission of thermal power in the ducted environment

**FAST:** For immediate warmth in your home, always and everywhere

🔊 **EXCLUDABLE FORCED VENTILATION**  
**SILENT:** silence, without sacrificing efficiency

⚙️ **PWM PUMP AUTOMATICALLY CONTROLLED BY THE ELECTRONIC BOARD**  
**SIMPLE:** Relax, the performance of your system is self-adjusting

≡ **NEW ELECTRONICS FOR CONNECTING TO THE SYSTEM EXPANSION CARD**  
**FLEXIBLE:** Maximum flexibility in the management of comfort in the rooms

📱 **HOME CONTROL SOLUTION**  
**INNOVATIVE:** Always in contact with your stove, even when you are away from home

🔔 **SELF-CLEANING BRAZIER**  
**CONVENIENT:** your stove cleans itself

🔥 **OPTIMISED COMBUSTION**  
**EFFICIENT:** Reduces the waiting time for relighting, ensuring optimal combustion

Silent and powerful,  
they distribute the heat  
rapidly and uniformly  
throughout the home.

# ROSANNA IDRO

Hermetic and ventilated pellet thermo-stove

Evolution  
*Life*

**A<sup>+</sup>** | 14,2 kW-N | 11,0 kW-H<sub>2</sub>O | 407 m<sup>3</sup>

## CHARACTERISTICS

- Pressure transducer and display pressure value indication
- Output smoke outlet possibilities: rear
- Safety valve 3 bar
- Combustion chamber in thick steel
- Air relief valve
- Ergonomic handle
- Door fire and brazier in cast iron
- Thermal and pressure safety
- Expansion tank
- Extractable ash drawer

# PR20

Pellet boiler with ash extractor

**A+** | 20,0 kW-N | 20,0 kW-H<sub>2</sub>O | 573 m<sup>3</sup>

## CHARACTERISTICS

- A** Hydraulic connections at the top
- B** Output smoke outlet possibilities:
  - rear, left lateral
  - Air relief valve
  - Minimum pellet tank level probe
  - Combustion chamber in thick steel
  - Combustion chamber probe
  - Door fire and brazier in cast iron
  - Thermal and pressure safety
  - Shell and tube exchanger (automatic cleaning)
  - Front pellet tank feeding
  - Expansion tank
  - Wheels to facilitate movement
  - Safety valve 3 bar
  - **Innovative adaptive system to adjust and even the combustion air inlet**
- C** Ash extractor

## TECHNICAL DATA

### Automatic loading pellet

stocking tank  
(Total capacity Kg 300)

**Glass cleaning system**  
A system of pre-heated air which removes any deposit from the fire-door glass.

**Extractable burn pot for easy cleaning**  
The burn pot's system of construction allows easy extraction for quick and complete cleaning.

## PELLET

**Auto-adjustment of the fumes extractor (encoder)**  
It keeps the RPM of the fumes motor constant, to ensure correct combustion of the product.

## WOOD-BURNING

**Hearth in Nordiker**  
La Nordica-Extraflame uses a special material called Nordiker for the production of hearth walls refractories.

**Post combustion**  
The combustion system developed by La Nordica-Extraflame allows, due to a secondary/tertiary air system, a post combustion which significantly reduces emissions.

**Hopper safety thermostat**  
Ensure always high safety standard, preventing the overheating of the product in case of anomaly.

**1st and 2nd air auto-balancing**  
Primary and secondary air electronically balanced for an optimal combustion and thermal efficiency.

**Outdoor temperature thermostat input**  
The product interfaces with room temperature control devices (thermostat or contacts) to achieve the selected temperature in every room.

**Doors in cast iron**  
The high-quality cast-iron doors are made to last and ensure perfect sealing at all times.

**Automatic safety device**  
It is a safety device created to quickly reduce water temperature, according to rules in force. DSA valve not included.

**Air-tight seal test at 50 Pa (100% of the products)**  
All the air-tight products, or even those that have some "air-tight" components (like the hopper), are tested under high pressure at the end of the production line to ensure their safety and optimal performance.

**Flue pipe safety pressure switch**  
Checks the correct evacuation of the fumes and, in case of need, locks the loading of pellets, to avoid problems on the generator.

**Chrono-thermostat**  
Chronothermostat provided with temperature control divided in four daily slots for an optimal rooms management.

**Glass cleaning system**  
A system of pre-heated air which removes any deposit from the fire-door glass.

**Direct outdoor air intake (BBC)**  
Air intake system which draws fresh air from outside directly into the adjust system combustion regulation of the firebox of the appliance.

**Auto-relighting after black-out**  
Following a black out the appliance automatically re-starts after having carried out the scheduled auto-control.

**Room temp. thermostat**  
The room probe optimizes comfort and lowers noticeably the consumption.

**Clean combustion**  
Increases the combustion efficiency and the duration of parts subject to wear duration reducing at the same time the ordinary brazier cleaning.

**Outdoor air intake (ASC)**  
A particular connection system which allows to introduce air from the outside into the pre-heated environment around the fire-box.

**Radiant system (PRS)**  
High efficiency Heat exchanger system

# CERTIFICATES

Italian Regulation for the Environmental Certificate release of domestic solid fuels biomass room heaters (Classification from 1 up to 5 stars).

## **BlmSchV**

German regulations on controlling emissions.

Only for Italy: the Ministerial Decree 28/12/12, better known as “Conto Termino”, allows a specific incentive in case of replacement of old appliances by new ones with certain characteristics

## **15a B-VG**

Compliance with article 15 of the Austrian federal constitutional law on environmental protection measures.

French trademark of the ADEME agency for the environment and the energy. The products “Flamme Verte” approved guarantee the best high energy performances and respect for the environment.

## **ECODESIGN**

European certification defining the ecodesign guidelines for biomass products.

Certification issued by the French Scientific and Technical Building Centre – CSTB – for watertight devices tested in watertight installation conditions.

## **MFB**

Only for Germany: The products is ready to be connected to a multiply chimney connection , just when the installation is made in accordance with requirements of the regional and national standards, and when observed the norms DIN EN 13384-2, DIN V 1816-1, DIN 18896 and MFeuV-2007 (Muster-Feuerungsverordnung), and that the district chimney sweeper has checked and approved the correct installation.

Certification issued by the German Federal Office for Economics and Export Control to promote the efficient use of biomass energy.

## **EASY SETUP**

The *Easy Setup* function allows the user to easily configure the stove so that it can operate as efficiently as possible with most types of pellets available on the market. It ensures optimum performance in terms of yield for each type of pellet.

## **EASY CONTROL**

In order to function, a stove must be connected to a system that has a flue and an external air inlet. Not all systems are the same as they depend on the physical characteristics of the building in which they are used: consequently, the operating conditions of the stove can vary considerably depending on the system itself. Thanks to the Easy Control function, the stove operates under optimal conditions even in difficult situations, minimising unwanted effects such as condensation and poor combustion, and it can also help to keep the glass of the stove door cleaner.

## **FLOW PERFORMANCE CONTROL (FPC)**

The FPC system keeps the supply of combustion air constant at all times, thus ensuring that combustion characteristics remain the same. In this way, maximum stove efficiency is achieved even when the system conditions (stove+flue pipe) change.

## **SELF CONTROL**

All Extraflame products use an automatic power management system (maximum power or minimum power) that allows the stove to reach the room temperature set by the user. Therefore, with the Self Control management mode, the desired temperature is reached in the shortest possible time.

## **AUTOMATIC**

Automatic is the evolution of the Self Control function. The stove accurately and continuously regulates the power output in order to reach and maintain the temperature set by the user. This translates into improved thermal and acoustic comfort and reduced consumption.

## **AIR ZONE CONTROL (AZC)**

The Air Zone Control feature is exclusive to products with a dedicated motor for ducting. The AZC function ensures maximum heat output to the ducting when the room in which the stove is installed has reached the set temperature. Therefore, in this mode, maximum comfort is achieved in the ducted area and consumption is significantly reduced when the set temperature is reached in the main room.

## **PRO AIR SETUP**

New setup for ventilation mappings. It allows the user to choose between 4 different room ventilation modes:  
Off = Fan off. N.B. Mode only available for models that have this setting option.  
Quiet = Fan speed is reduced for noise reduction (compared to Regular).  
Regular = Default configuration.  
Boost = Fan speed is increased compared to Regular in order to maximise ventilation air flow.

## **INTEGRAZIONE DOMOTICA "ALEXA"**

With this extra feature, the stove can be controlled via the "Alexa" (Amazon) voice assistant. This operation requires an Internet connection + the new Total Control 3.0 app: therefore, the product must have the "Grey" module or have this function integrated in the board/display set up for the 3.0. app.

## NOTE

- Due to printing reasons the reproduction of colours has to be considered only indicative.
- The fuel quantity (weight) inside the hopper and the hour consumption can change depending on the type of pellet which is used.
- All the figures were measured using approved pellets in compliance with EN ISO 17225-2.
- Facing tones and characteristics are subject to slight variations because they are natural products.
- The manufacturer reserves the right to change the products without any previous notice.
- The La Nordica-Extraflame products can be covered by industrial property rights (such as patents, designs and trademarks) owned by La Nordica-Extraflame exclusively. It is strictly forbidden to violate these rights as for removing, cancelling or corrupting the trademarks impressed on the products and impressing others.
- m<sup>3</sup> that can be heated: the data is indicative. For the generator to be sized correctly, contact a skilled technician/designer.
- Before the purchase, ask your reseller all the information regarding the appliance. One must also bear in mind all laws and national, regional, provincial and town council Standards present in the country in which the appliance has been installed, as well as the instructions contained in this manual.
- The images contained in this document are for product illustration purposes only and do not represent indications for the performance or technical characteristics of the same.
- The data in the catalogue can be rounded off to the first decimal.
- La Nordica-Extraflame products are approved to work with 230V 50Hz power supply only. The use with different voltages and / or frequencies supply can compromise the functionality and safety of the products.

## ENERGY LABEL

As of 1st January 2018 the Energy Labelling Regulation came into force also for all the biomass heating appliances, both roomheater appliances and appliances designed to heat the water for central heating and domestic hot water.

This directive, in accordance with the regulations of the European Union, will assign an Energy Efficiency Class (from G up to A++) providing the buyers with information about the consumption and the efficiency

## LEGEND

**kW-N:** Nominal thermal power (kW)

**kW-H<sub>2</sub>O:** Power given back to water (kW)

**m<sup>3</sup>:** Heatable m<sup>3</sup> (30 kcal/h x m<sup>3</sup>)

**%:** Efficiency (%)

**kg-l:** Feed box Total capacity (kg-l)

**kg/h:** Hourly consumption (kg/h)

**Ø mm:** Smoke outlet diameter (mm)

T = Top

B = Back

RH side = Right side

LH side = Left side

**Dim. LxHxD:** Dimensions LxHxD (mm)

**kg:** Net weight (kg)

**W:** Electric consumption (W)

**bar:** Working pressure (bar)
