Innovative technology in timeless design

A crackling fire draws the eye and invites you to relax in front of the fire. Anyone who wants to experience a pattern of flames in exclusive style can be inspired by the impressive variety of extraordinary LIVING FIRE stoves from Spartherm. Manufactured in Germany with high-quality, selected materials, the current models combine innovative stove technology and pioneering design in harmonious perfection. To make the fire experience even more personal, numerous modifications have been developed to individualise each stove to suit your own needs. Numerous LIVING FIRE models also impress with the „S-Thermatik NEO“ combustion control system, which uses the fuel with maximum efficiency in the spirit of sustainability. At the same time, the optional thermal storage medium elements provide even more cosy warmth and a feel-good ambience in the firelight.

LIVING STYLES – A FIRE FOR STYLE

Elegant design classics in vintage style, modern Scandinavian furniture or purist minimalism, personal furnishing styles often reveal the deepest wishes and needs. Because how the personal place of well-being is created is a very individual decision. If you manage to evoke feelings and create harmonies with furniture and decorations, you will feel comfortable in your own four walls. Then all that is needed is a fireplace to warm the soul as well. This creates a place with which stories and people connect – a home.

No wonder that more and more people appreciate this very special living feeling within their own four walls. This is why Spartherm has designed its LIVING FIRE product range with so many variants that the stoves can be freely positioned in the room and set unusual accents in the ambience. Because thanks to the innovative design ideas of the Spartherm experts, the stoves fit harmoniously into any individual furnishing concept – tasteful, exclusive and stylish.

Passo

Round and attractive

The round shape is what makes the Passo so charming. Clear lines and a no-frills design allow this stove to harmonise with a wide variety of furnishing concepts – discreet and calming. At the same time, the Passo certainly has a present appearance, but as a slender column it is also elegant and not too dominant.

(underpressure control)

Passo L

Passo XS with wood
store on the right

In other models, the Passo XS in the rather small compact version and the Passo L as a tall column are impressive. In all Passo variants, the blazing fire in the centre of the stove is presented at a 180 degree angle. This naturally creates an atmosphere of well-being.

Passo XS style

Courage to use colour

Passo XS style

The Passo XS style inspires with a variety of modern colours. The handle and the base are made of real wood and give the extraordinary stove a young and urban look, just like the soft edges of the steel body. The unique, specially developed 180-degree panoramic glass skilfully sets the fire in scene.

The smart assistance functions also support the special style. The S-Thermatik NEO – electrically controlled – allows the logs in the stove to burn evenly and effectively. In addition, an electrically operated underpressure control can provide maximum safety in a smart way – that's LIVING FIRE by SPARTHERM at it's best!

Passo XS tripod

Unique on three legs

A design highlight for the home. The Passo XS tripod is a stove that rests majestically on a pedestal like a piece of furniture and unites the best of both worlds. Its three legs not only ensure the Passo XS tripod is stable, they also make it a defining style element in any furnishing concept.

As safety is a top priority for all LIVING FIRE by SPART-HERM stoves, the smart-controlled underpressure control has also been developed for this model. This is how the latest innovative combustion technology meets the trendy style of the time. This unique look thus sets special accents for an extraordinary ambience.

The Cubo is a stove that surprises with its special lines. Its gently rounded corners, which seem almost soft, combine harmoniously with the minimalist, modern overall design.

Whether as Cubo S in the compact version or in the tall version as Cubo L, the Cubo models can be perfectly positioned in the corner of a room with its hinged door or placed directly in front of the wall. If desired, the firewood can also be stylishly staged in a specially designed firewood compartment in the Cubo L model. Thus, this unusual stove in all its variants enriches every ambience with its discreet yet elegant appearance.

Cubo L style

For unique style

Cubo L style

Fancy shape and colour? Then the Cubo L style, which has a generous glass across the corner, is sure to whet your appetite with its many design variations. Be it the soft wood tone or the turquoise reminiscent of the ocean, with the Cubo L style modern trend colours and wood applications can be combined in many new ways – for a unique personal style.

To support this style in a smart way, Spartherm has developed some innovative assistance functions for the stove. In this way, the electrically controlled S-Thermatik NEO allows the wood to burn evenly in a CO₂-neutral manner. The electric underpressure control, designed according to the latest state of the art, ensures maximum safety.

USE HEAT SEVERAL TIMES

Sustainable action. Heat can be generated by burning wood. This is considered a CO₂-neutral alternative to oil or gas-fired heating. So what would make more sense than to use ultra-modern technology to make the most sustainable use possible of the residual heat in the exhaust gas? This means that the innovative stoves from LIVING FIRE by SPARTHERM can also be used to heat water. The water heated via the stove is buffered in a hot water tank and can then be made available to the underfloor heating, for example. In this way, not only is an efficient heating system with high heat output created, but at the same time hot water can also be obtained for the household – sustainably and ecologically.

Water-conducting stoves deliver impressive values:

- 25–80% water heat content
- 78–86% firing efficiency
- CO₂-neutral

AN ADVANTAGE FOR THE ENVIRONMENT: STOVES FOR HOT WATER PRODUCTION

The fireplaces with H₂O technology from Spartherm are particularly energy-efficient. For this, they require no more space than a conventional warm air or storage system. In this way, they offer themselves as a CO₂-neutral alternative in hot water generation and create a feel-good ambience in every respect – with a clear conscience.

SPARTHERM BLACK EDITION CUSTOMISED DESIGN IN INDUSTRIAL STYLE
